

### **Abstract of the Disclosure**

The reach of R.F.Furchgottle and L.J.Ignarro which leads to the "NO theory" has shock the whole world. My invention is a combined patent including pharmacology as well as isolation and purification of Bombyx moriL. In my product, Bombyx moriL accounts for 56%, others 44%. We also adopt WLD resin absorption, other purification technology, and gas chromatography. The biological activity is ensured because all the process is at 85°C. My product has selective effect on cavernous body, increasing cGMP and NO by the inhibition in of PED<sub>5</sub> enzymes. The Doppler test for the maximum and average blood flow in cavernous body also further proved the conclusion of the pharmacological activity.

## Abstract of the Disclosure

(attached table 1)

1	Bombyx moriL Saturniidae	2	Rhizoma corydalis	3	Fructus Schisandae
	Antheraea Pernyi Gnerin-meneville (male adult)		Papaveraceae Corydalis Yanhuso W.T.Wang (dry stem tuber)		Magnoliaceae Schisandra Chinensis(Tuncz)Baill (fruit)
4	Herba Epimedii	5	Cortex Cinnamomi	6	Semen Trigonellae
	Berberidaceae Epimedium brevicoram Maxm (falling branches)		Lauraceae Cinnamomum Cassia Presl (dry hide)		Leguminosae Trigonella foenum-graecum (seed)
7	Semen Cuscutae	8	SemenAllii Tuberosi	9	Fructus Foeniculi
	Convolvulaceae(cuscutoidae) Cuscuta Chinensis Lam (fruit)		Liliaceae Allium tuberosum RottL. (seed)		Umbelliferae Foeniculum Vulgaremill (fruit)
10	Herba Cistanchis	11	Common Panaxoside-	12	Radix Achyranthis-
	Orobanchaceae Cistanche deserticola Y.C.Ma (succulent stem)		Ginseng Araliaceae Panax Ginseng C.A.Mey (dry root)		Bidentatae Amaranthaceae Achyranthes bidentata BL. (dry root)
13	Rhizoma Carculiginis	14	Fructus Cnidii		
	Amaryllidaceae Curculigo Orchioides Gaertn(root and stem)		Umbelliferae Cnidium Monnieri(L.)Cuss.(fruit)
